### BUSINESS DIAGNOSTIC AND HEALTH CHECK UP

A business diagnostic and health assessment puts the power in your hands to perform a Business Diagnostic & Health Check through a strategic and operational audit. The audit, a questionnaire, offers a structured approach for revealing the situation of the business in both its wider business environment and internal operations – identifying the strengths, weaknesses, opportunities, and threats it faces.

### Business Diagnostic & Health Check – Accounting ...

The process for Business Health Check involves two parts. Firstly, the answers to a succession of questions will be provided. This is the part that involves diagnostics. An experienced business coach and adviser will then review the answers. The review must be carried out by an independent, business coach, who possesses the required knowledge and skill to direct and support the development of a pathway to success.

### The Meaning, Benefits and Process of Business Health Check ...

Diagnostics range from a general business health check through to drilling down into a multitude of specific business areas. There are diagnostics that measure if a company employs lean manufacturing techniques; whether their purchasing and supply chain management is effective; if their market mapping is sound and their project management up to speed.
