Solutions to The Practice of Statistics for AP ...

One! The score that is the median or closest to it. For example, if the scores were 1, 3, 5, the median would be 3.0. If we change the 3 to a 4, then the median would be 4.0. Changing either the 1 or the 5 would not change the median (e.g., 2, 3, 100). 2. How many values can you change without changing the median? All of them!
