range of contributions
from America,
Australia, and Europe,
Planning for Cycling
sums up many of the
lessons learned and
shows how they can be
applied in improving
urban planning. The
book examines national
strategies and local
initiatives in cities
around the world. It
includes topics such as

the creation of 'homezones', changes to existing road and rail infrastructure, and the integration of cycling with public transport. The author highlights education as a critical element in cycling planning and covers the promotion of bicycling and developing healthy travel habits in the young. He looks at the

Get Free Circolare Di Provincia Di Dichiarazione In Materia

complex relationship between cars and cycling and discusses how roads can be successfully shared between these two modes of transport. With its blend of practical experience and suggestions for effective implementation, *Planning for Cycling* is essential reading for urban planners,
