Relations between the EU and East Asia have consistently expanded in recent years, particularly between the EU and Japan. Against the background of negotiations on an economic and strategic partnership agreement, the EU-Japan relationship is set to become the single most comprehensive 'region-to-state' relationship the world has known today, accounting for more than a third of world GDP and a combined population of more than 600 million people. This book addresses the potential role of the EU, in cooperation with Japan, to craft a stable and prosperous mode of governance in the Asian region. In today's globalized world seemingly defined by waxing Chinese power and waning American power, the book reflects the lack of appreciation for an EU-Japan concert in maintaining and developing multilateral principles. It aims towards fortifying this relationship by acknowledging that in order to enhance the credibility and capabilities of such an alliance, it is necessary to take stock of where the partnership stands today, what kind of obstacles still need to be overcome and which options have been left untouched. By introducing state-of-the-art empirical research in multiple fields, this book will be of key interest to students and

Sustainable History and the Dignity of Man is a new philosophy of history. This volume outlines how sustainable history is propelled by good governance, which balances the tension between the attributes of human nature - emotionality, amorality and egoisms - and human dignity needs, such as reason, security, human rights, accountability, transparency, justice, opportunity, innovation and inclusiveness. The author proposes minimum criteria for good governance that are sensitive to local cultures and histories but meet certain common global values to ensure maximum and sustainable moral and political cooperation. Using an ocean model of a single collective human civilisation, the author argues that we should think in terms of a common human story that is comprised of multiple geo-cultural domains and sub-cultures with a history of mutual borrowing and synergies. The author argues that, today, all geo-cultural domains must succeed if humanity as a whole is to triumph. This collective triumph will also depend on reason and a recognition that a great deal of knowledge is indeterminate and may be temporally, spatially and perhaps culturally constrained, as is outlined in the author's new theory of knowledge: "Neuro-rational Physicalism". "This book is an exceptionally wide-ranging examination of past and present approaches to the securing of a qualitatively adequate social life on the planet. The need for intercultural dialogue is pressing and stated as a matter of urgency in the text. That argument is well-presented and it is helpfully accompanied by a large amount of empirical evidence. The book is also a strong and ethically attractive humanist statement about the value of human interaction that incorporates a vision of mutual respect based on a mixture of scientific arguments and normative aspirations. Those features are very impressive." Professor Michael Freeden, Professor of Politics, Director of the Centre for Political Ideologies, Professorial Fellow, Mansfield College, University of Oxford, United Kingdom.

Understanding Global Poverty introduces students to the study and analysis of poverty, helping them to understand why it is pervasive across human societies, and how it can be reduced through proven policy solutions. The book uses the capabilities and human development approach to foreground the human aspects of poverty, keeping the voices, experiences, and needs of the world's poor

central to the analysis. Starting with definitions and measurement, the book goes on to explore the causes of poverty and how poverty reduction programs and policy have responded in practice. The book also reflects on the ethics of why we should work to reduce poverty and what actions readers themselves can take. This new edition has been revised and updated throughout, featuring:

- a new chapter on migration and refugees
- additional international examples, including material on Mexico, Covid-19 in global perspective, and South-South development initiatives
- information on careers in international development
- insights into how various forms of social difference, including race, ethnicity, social class, gender, and sexuality relate to poverty

Fully interdisciplinary in approach, the book is also supplemented with case studies, discussion questions, and further reading suggestions in order to support learning. Perfect as an introductory textbook for students across sociology, global development, political science, anthropology, public health, and economics, *Understanding Global Poverty* will also be a valuable resource to policy makers and development practitioners.

Evan Easton-Calabria's critical history of refugee self-reliance assistance brings new dimensions to refugee and international development studies. The promotion of refugee

self-reliance is evident today, yet its history remains largely unexplored, with good practices and longstanding issues often missed. Through archival and contemporary evidence, this book documents a century of little-known efforts to foster refugee self-reliance, including the economic, political, and social motives driving this assistance. With five case studies from Greece, Tanzania, Pakistan, Uganda, and Egypt, the book tracks refugee self-reliance as a malleable concept used to pursue ulterior interests. It reshapes understandings of refugee self-reliance and delivers important messages for contemporary policy making.
