Jacob Fox, son of the notorious Neil Fox, wanted nothing more than to disappear. There had been a media frenzy during the arrest of his parents and their subsequent deaths, and Jacob couldn't escape all the negativity surrounding the ordeal. He decided to buy a house in south Louisiana on a private, wooded lot in the middle of the bayou so he could drop of the face of the earth for a while. He certainly hadn't come to Louisiana to make friends. Unfortunately for him, the neighbors surrounding his property were overly friendly. With the help of his Doberman Pincher, Jacob ran off anyone who tried to welcome him to the area. That seemed to be working pretty well until he met Alex Martin. She simply wanted to offer a little southern hospitality at first, but eventually she realized she might be the only person who could help Jacob rediscover the man he used to be.

Campbell Lee St. Martin has always played by the rules. He follows his head not his heart, but when that backfires not once, but twice, changes are in store for this Mr. Play It Safe. He's instantly attracted to Jenny's uninhibited sexuality but soon learns that together, they are highly combustible. Jenny thinks Campbell is a bastard and she doesn't mind putting him in his place. What he needs is a hard slap across the face, which Jenny is willing to provide even if it means the loss of her job, but it doesn't. Instead, their chemistry forces them together in a physical relationship that neither of them will ever forget. Is it possible to build on a relationship that started from lust?

It's time we stand up and demand more of the fathers of this world. It's time we stop buying into their rationalization and their sorry explanations. It's time we give our kids a fighting chance. This book provides an opportunity to add dialogue and serious thoughts on how parents are raising the next generation. "Not only does a good father provide a good example of what we can anticipate in terms of dealing with the world, he also gives us a sense of confidence, certainty and information". "A good father is someone who is strong in his faith and understands that they have been tasked with creating and having a vision for his family and doing everything in his power to provide the necessary resources," "It also requires a great deal of sacrifice.

Named a Best New Cookbook of Spring 2020 by Bon Appétit, Food & Wine, NPR's The Splendid Table, Eater, Epicurious, and more "Sometimes you find a restaurant cookbook that pulls you out of your cooking rut without frustrating you with miles long ingredient lists and tricky techniques. Mosquito Supper Club is one such book. . . . In a quarantine pinch, boxed broth, frozen shrimp, rice, beans, and spices will go far when cooking from this book." —Epicurious, The 10 Restaurant Cookbooks to Buy Now "Martin shares the history, traditions, and customs surrounding Cajun cuisine and offers a tantalizing slew of classic dishes." —Publishers Weekly, starred review For anyone who loves Cajun food or is interested in American cooking or wants to discover a distinct and engaging new female voice—or just wants to make the very best duck gumbo, shrimp jambalaya, she-crab soup, crawfish étouffée, smothered chicken, fried okra, oyster bisque, and sweet potato pie—comes Mosquito Supper Club. Named after her restaurant in New Orleans, chef Melissa M. Martin's debut cookbook shares her inspired and reverent interpretations of the traditional Cajun recipes she grew up eating on the Louisiana bayou, with a generous helping of stories about her community and its cooking. Every hour, Louisiana loses a football field's worth of land to the Gulf of Mexico. Too soon, Martin's hometown of Chauvin will be gone, along with the way of life it sustained. Before it disappears, Martin wants to document and share the recipes, ingredients, and customs of the Cajun people. Illustrated throughout with dazzling color photographs of food and place, the book is divided into chapters by ingredient—from shrimp and oysters to poultry, rice, and sugarcane. Each begins with an essay explaining the ingredient and its context, including traditions like putting up blackberries each February, shrimping every August, and the many ways to make an authentic Cajun gumbo. Martin is a gifted cook who brings a female perspective to a world we've only heard about from men. The stories she tells come straight from her own life, and yet in this age of climate change and erasure of local cultures, they feel universal, moving, and urgent.

Discover an eye-opening multilayered book based on the author's observations and experiences illuminating the Mississippi Delta's interwoven yet distinct culture, customs, and traditions. In his coming-of-age story, he simultaneously explores flags and symbols, and challenges learned beliefs to understand better the Delta's barriers and how they impacted him. He illustrates the most transformational period and its actors, legislation, and the consequences that follow. Likewise he: delves into the emancipated people and their descendants' pain, perseverance, and triumphs. He is then brightening the way with family, friends, neighbors, stories of faith, love, joy, and hope; explains the history of a controversial flag and its value; through self-discovery, discusses successes and failures, his ability to set and obtain goals; realizes that his generation may well be the last link in the chain connecting the past to the future through measured understanding. In Red Flags for Mississippi, A Native Son's Journey, the author provides a roadmap with many adventurous twists and turns. He reminds us that we are forever linked to the past, and history is our cornerstone. With knowledge comes understanding and then wisdom. Everyone, especially Mississippians, should read Red Flags for Mississippi, A Native Son's Journey at least once in their lives.

[Note: The most complete version of the big picture that eluded Einstein in his attempts to unveil a unified field theory can be found in the book, The Gravity Cycle, by the same author as this book. This book, Einstein Was Wrong!, was one of many approaches to the ideas that will shake the very foundations of physical science upon which we presently stand.] Modern Physics is built on an erroneous foundation. If we are to take physics to a new level where gravity can be explained from an atomic/quantum perspective, then someone must boldly say, "Einstein was wrong, but so was Newton." Because they both started with the same wrong premise, their theories of gravity were destined to fall short in any attempt to connect them to atomic/quantum processes. And the same false premise that stifled Einstein in his ability to connect "the movement of planets and stars with the tiniest subatomic particles" prevents modern physicists from explaining the fourth and final force from an atomic/quantum perspective. Alas, "...when one starts with a wrong premise, no amount of patching can right the problem." But all is not lost. By correcting Newton's mistake (the wrong premise), a new foundation for understanding the role of the atom in the momentum, relativity, and gravity of masses emerges in the form of two new theories: The Atomic Model of Motion (AMM) and The Galaxy Gravity Cycle (GGC). These two theories combine to paint the big picture of how atomic/quantum processes are involved in holding a galaxy together, keeping planets orbiting stars, and preventing people from floating off into space. This book is dedicated to Occam's razor.
