Theoricae novae planetarum (New theory of the planets). Venice: Erhart Ratdolt, 1485. Two of the major astronomy textbooks in the early Renaissance. Sacrobosco's De sphaera dates from the mid-thirteenth century, while Peurbach's work was first published in 1474. This edition of these texts is unique in the history of printing because it is ...

~~Renaissance Astronomy~~

Two other major astronomers from the Renaissance were Tycho Brahe and Johannes Kepler. Tycho was a Danish nobleman who took many precise measurements of the planets and stars over a long period of time. Tycho made many strides in the work of observing the heavens. Kepler was a German astronomer who worked as Tycho's assistant for a time.

~~History: Renaissance Astronomy for Kids~~

During the Renaissance, scholars rediscovered the works of Plato as they filtered into Europe through Muslim Spain and Byzantium. To the scholars, Plato's idea of a universe built around harmonic perfection seemed logical and they, like the Muslims before them, adopted Plato's Algamest as the definitive work on astronomy. However, while Plato's meticulous measurements and observations were found to be
