This book seeks to understand the urban change dynamic so that the planning of urban places aligns with the dynamic of people ' s perception of place. Planning Urban Places examines the premise that building cities is a concrete business surrounded by a shifting context. It discusses the notion of urban design and placemaking from the perspective of place perception and cognitive psychology, place philosophy and human geography.

This short excursion into the composition of current urban road networks confirms the possibility that road networks are one of the robust, invariant outcomes of a self-organizing system—the city. But unlike the extensive geographic and temporal research that led to the indisputable confirmation of the travel-to-work time constant in my previous article, this limited effort leaves ...
