Blending science and lifestyle recommendations, Dr. Reed prescribes eight essentials that will help reverse harmful health habits and prevent disease. Discover how intentional choices, rest, environment, activity, trust, relationships, outlook, and nutrition can put a person on the road to wellness. Features a three-day total body rejuvenation therapy and four-phase life transformation plan.

Blending science and lifestyle recommendations, Dr. Reed prescribes eight essentials that will help reverse harmful health habits and prevent disease. Discover how intentional choices, rest, environment, activity, trust, relationships, outlook, and nutrition can put a person on the road to wellness. Features a three-day total body rejuvenation therapy and four-phase life transformation plan.

Creation Life is an exciting plan for changing your life. Rightly applied, you will achieve mental, physical, spiritual and emotional well being. Each letter of the word CREATION stands for one of the eight principles drawn from the Genesis story. Choice - Rest - Environment - Activity - Trust - Interpersonal relationships - Outlook - Nutrition. These eight essential components meld together to form the blueprint for health we yearn for and the life we are intended to live. Some of the concepts presented in the CREATION Life acronym will seem like common sense because they are exactly that. Other concepts you may not have been as familiar with but will learn through the evidence of science.

Create a world-changing venture. Silicon Valley's latest trend for creating new ventures is based on trial and error: test market needs with new product concepts and a minimum amount of capital, expect that the product may not meet the market need, so fail fast and try another product with the hope that a product-market fit will eventually emerge. But this fail fast, step-and-pivot philosophy is like taking a random walk in the forest without a compass. *If You Really Want to Change the World* is about helping entrepreneurs find true north. Henry Kressel and Norman Winarsky—technologists, inventors, and investors with stellar track records—provide a guide for those who wish to create a market-leading company that will have a real impact: a disciplined and staged approach they have used to launch, invest in, and develop scores of highly successful companies. *If You Really Want to Change the World* leads entrepreneurs through the critical stages of venture development, from concept to acquisition or public offering to maintaining a rich culture of innovation in the company. It is a guide by innovators for innovators, with approaches that are practical and timeless. Drawing on the authors' experiences as well as those of their partners from around the world, Kressel and Winarsky share the stories of their triumphs and misses, demonstrate their method in action, and inspire their readers in the process. There are more opportunities now than ever before to build breakthrough companies that touch millions of lives. If this is your goal, let this book be your guide to creating world-changing ventures.

BY THE WINNER OF THE 2020 NOBEL PRIZE IN CHEMISTRY Finalist for the Los Angeles Times Book Prize "The future is in our hands as never before, and this book explains the stakes like no other." — George Lucas "Required reading for every concerned citizen." — New York Review of Books Not since the atomic bomb has a technology so alarmed its inventors that they warned the world about its use. That is, until 2015, when biologist Jennifer Doudna called for a worldwide moratorium on the use of the gene-editing tool CRISPR—a revolutionary new technology that she helped create—to make heritable changes in human embryos. The cheapest, simplest, most effective way of manipulating DNA ever known, CRISPR may well give us the cure to HIV, genetic diseases, and some cancers. Yet even the tiniest changes to DNA could have myriad, unforeseeable consequences, to say nothing of the ethical and societal repercussions of intentionally mutating embryos to create "better" humans. Writing with fellow researcher Sam Sternberg, Doudna—who has since won the Nobel Prize for her CRISPR research—shares the thrilling story of her discovery and describes the enormous responsibility that comes with the power to rewrite the code of life. "An invaluable account . . . We owe Doudna several times over." — Guardian

Armed with more than twenty years of research, Dr. Rippe lays out a 10-step blueprint for mind-body-spirit wellness For the first time, world-renowned cardiologist Dr. James Rippe, in conjunction with Florida Hospital—the largest admitting hospital in America—reveals to the general public his distinctive 10-step mind, body, and spirit program used by top executives and star athletes to revolutionize their health and turn it into the ultimate performance tool. Written for every person regardless of current health status or circumstances, this lifestyle guidebook challenges readers to "Take back your health!" by outlining a filter to process any new diet, health, or lifestyle idea. Using real-life stories that demonstrate health as a value, Dr. Rippe goes beyond the basics to address the deeper purposes that give our lives meaning. Genuinely

motivational, High Performance Health offers the secrets to our best possible health and life today!

Follow along as this New York Times bestselling author details the astonishing scientific discovery of the code to unleashing the human immune system to fight in this "captivating and heartbreaking" book (The Wall Street Journal). For decades, scientists have puzzled over one of medicine's most confounding mysteries: Why doesn't our immune system recognize and fight cancer the way it does other diseases, like the common cold? As it turns out, the answer to that question can be traced to a series of tricks that cancer has developed to turn off normal immune responses -- tricks that scientists have only recently discovered and learned to defeat. The result is what many are calling cancer's "penicillin moment," a revolutionary discovery in our understanding of cancer and how to beat it. In *The Breakthrough*, New York Times bestselling author of *The Good Nurse* Charles Graeber guides readers through the revolutionary scientific research bringing immunotherapy out of the realm of the miraculous and into the forefront of twenty-first-century medical science. As advances in the fields of cancer research and the human immune system continue to fuel a therapeutic arms race among biotech and pharmaceutical research centers around the world, the next step -- harnessing the wealth of new information to create modern and more effective patient therapies -- is unfolding at an unprecedented pace, rapidly redefining our relationship with this all-too-human disease. Groundbreaking, riveting, and expertly told, *The Breakthrough* is the story of the game-changing scientific discoveries that unleash our natural ability to recognize and defeat cancer, as told through the experiences of the patients, physicians, and cancer immunotherapy researchers who are on the front lines. This is the incredible true story of the race to find a cure, a dispatch from the life-changing world of modern oncological science, and a brave new chapter in medical history.
