Born in Wisconsin in 1867, Frank Lloyd Wright became obsessed with a set of building blocks his mother had given to him on his ninth birthday. He grew up to become the father of organic architecture and the greatest American architect of all time, having designed more than 1,100 buildings during his lifetime. These included private homes - such as the stunning Fallingwater, churches, temples, a hotel, and the world-famous Guggenheim Museum in New York City. When asked how he could create so many designs, he answered, "I can't get them out fast enough." Frank Lloyd Wright was a man ahead of his time who could barely keep up with his own ideas!

Frank Lloyd Wright has long been known as a rank egotist who held in contempt almost everything aside from his own genius. Harder to detect, but no less real, is a Wright who fully understood, and suffered from, the choices he made. This is the Wright whom Paul Hendrickson reveals in this masterful biography: the Wright who was haunted by his father, about whom he told the greatest lie of his life. And this, we see, is the Wright of many other neglected aspects of his story: his close, and perhaps romantic, relationship with friend and early mentor Cecil Corwin; the eerie, unmistakable role of fires in his life; the connection between the 1921 Black Wall Street massacre in Tulsa, Oklahoma, and the murder of his mistress, her two children, and four others at his beloved Wisconsin home. In showing us Wright's facades along with their cracks, Hendrickson helps us form a fresh, deep, and more human understanding of the man. With prodigious research, unique vision, and his ability to make sense of a life in ways at

once unexpected, poetic, and undeniably brilliant, he has given us the defining book on Wright.

Charming memoir, by his son, of Wright as genius, father, and family man. The book also includes the complete text of William C. Gannet's *The House Beautiful*, a work designed by Wright. 10 halftones.

Focusing on one of the most productive and innovative periods in the architect's career, a study of Wright's mid-twentieth-century architectural designs looks at such seminal masterworks as the Guggenheim Museum, Price Tower, Fallingwater, the Loveness House, and an array of furniture and object designs. 12,500 first printing.

In architectural terms, the twentieth century can be largely summed up with two names: Frank Lloyd Wright and Philip Johnson. Wright (1867–1959) began it with his romantic prairie style; Johnson (1906–2005) brought down the curtain with his spare postmodernist experiments. Between them, they built some of the most admired and discussed buildings in American history. Differing radically in their views on architecture, Wright and Johnson shared a restless creativity, enormous charisma, and an outspokenness that made each man irresistible to the media. Often publicly at odds, they were the twentieth century's flint and steel; their repeated encounters consistently set off sparks. Yet as acclaimed historian Hugh Howard shows, their rivalry was also a fruitful artistic conversation, one that yielded new directions for both men. It was not despite but rather because of their contentious--and not always admiring--relationship that they were able so powerfully to influence history. In *Architecture's Odd Couple*, Howard deftly traces the historical threads connecting the two men and offers readers a distinct perspective on the era they so enlivened with their designs. Featuring many of the structures that defined modern space--from Fallingwater to the Guggenheim, from the Glass House to the Seagram Building--this book presents an arresting portrait of modern architecture's odd couple and how they shaped the American landscape by shaping each other.

The widely admired biographer of Bernard Berenson ("A triumph"--*Washington Post*; "A perfect riot"--Michael Holroyd; "Astonishing"--*London Sunday Times*) and of Kenneth Clark ("Splendid, enthralling"--*The Wall Street Journal*) gives us now a complete and complex portrait of an American titan, Frank Lloyd Wright. Meryle Secrest shows us Frank Lloyd Wright in full scale--the brilliant, outrageous, fascinating man; the giant who changed modern architecture; the standard-bearer for the new, quintessentially American vision, the artist who never, during a seventy-year career, abandoned his principles of design; the radical, the Bohemian--the visionary who was one of the central figures of the twentieth-century American culture, society and politics. Meryle Secrest is the first biographer to have full access to the Frank

Traces the complicated development of Frank Lloyd Wright's Fallingwater, including planning, site selection, and construction

Frank Lloyd Wright wasn't just an architect. He was a prophet, a poseur; a beloved teacher, a failed businessman. During his long, eventful life he experienced both incredible misfortune and great success. This Is Frank Lloyd Wright brings his projects and persona into vivid focus. Wit and visual punch have been the hallmarks of the This Is series to date; the first architectural title in the series will give readers an up-close look at Wright's progress from difficult childhood, to struggling apprenticeship, to early success, through mid-life setbacks and on to late-life comeback. Beautiful specially commissioned illustrations documenting the important events in his life sit alongside photographs of Wright's most iconic buildings (including Fallingwater and New York's Guggenheim Museum).

The first history of Frank Lloyd Wright's exhibitions of his own work—a practice central to his career More than one hundred exhibitions of Frank Lloyd Wright's work were mounted between 1894 and his death in 1959. Wright organized the majority of these exhibitions himself and viewed them as crucial to his self-presentation as his extensive writings. He used them to promote his designs, appeal to new viewers, and persuade his detractors. Wright on Exhibit presents the first history of this neglected aspect of the architect's influential career. Drawing extensively from Wright's unpublished correspondence, Kathryn Smith challenges the preconceived notion of Wright as a self-promoter who displayed his work in search of money, clients, and fame. She shows how he was an artist-architect projecting an avant-garde program, an innovator who expanded the palette of installation design as technology evolved, and a social activist driven to revolutionize society through design. While Wright's earliest exhibitions were largely for other architects, by the 1930s he was creating public installations intended to inspire debate and change public perceptions about architecture. The nature of his exhibitions expanded with the times beyond models, drawings, and photographs to include more immersive tools such as slides, film, and even a full-scale structure built especially for his 1953 retrospective at the Guggenheim Museum. Placing Wright's exhibitions side by side with his writings, Smith shows how integral these exhibitions

were to his vision and sheds light on the broader discourse concerning architecture and modernism during the first half of the twentieth century. Wright on Exhibit features color renderings, photos, and plans, as well as a checklist of exhibitions and an illustrated catalog of extant and lost models made under Wright's supervision.

Written during what he himself terms, a "bad time" in his life, in this book the master architect recounts his work, his philosophy, and his personal life. He recalls his childhood, his apprenticeship (the decisive association with Dankmar Adler and Louis Sullivan), his self-described stormy personal life (including the affair that lead to his second marriage), his travels, and the circumstances surrounding some of his greatest architectural achievements--including the Prairie and Usonian Houses, the various incantations of Taliesin, the Imperial Hotel in Tokyo, and the famous Hollyhock House.
